Group: GBA

A maniac “shootemupuzzler”.

What does it mean? I don't know but it's quite hard, weird and inspired by Ikaruga, Mr Driller and Magical Drop. Furthermore it totally steals the radiant silvergun chaining system for scoring.

Buttons:

- **B** to shoot
- **A** to change your shoot color - only matching color destroys enemies

If your controls seem broken, or you can't shoot, try to enter option screen, and press simultaneously **SELECT + START + L + R**. This will reset memory settings of the game, and you should be able to play.
