Here is the very first version of "Gudule", a brand new game I made. Absolutely no ripping in this game, I did all the graphics and the music ... At last I can create my very own game. I waited that for more than 30 years.

This version contains the first level : Castle Hog.

Gudule is a dumb barbarian I drawn when I was 17. The pig-men are drawings I made when I was 12.
Here they're all gathered together in a game :)

In this game you can choose your way in some levels as in OutRun (but without the car) !

Here are the commands (AZERTY keyboard) :
Q - Attack
S - Block
D - jump
F - Taunt

down - right - attack : infernal turnstile
jump - attack : jump attack
down - down - attack : "Hammer" attack
right - right : ground hit

While enemy grabbing :
attack : hit da ballz !!!
down - attack : head slam
opposite direction - attack : throw enemy

I'll let you discover the keys combination.
There's still some problems to solve, so stay tuned for the next versions of Gudule
