Tongueman's Logic

By Chris Covell
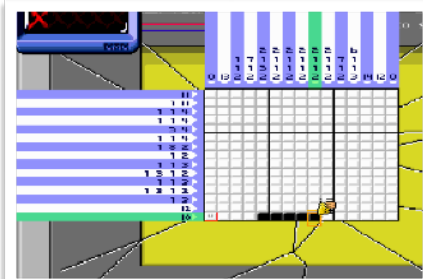

https://www.chrismcovell.com/TMLogic.html

Puzzle game similar to Nintendo's Picross series (also known as Nonogram or Oekaki Logic).

Basically, it works like a picture crossword. You have to use the numbers along the edge of the grid to figure out where dots go inside the grid. The final result after a bunch of guessing and logic is a pixelated image!

200 puzzles from 5x5 to 30x30, with all the rules explained in the training mode. Oh, and this game contains RetroAchievements!
